DETAILED ACTION

Allowable Subject Matter

Claims 1-33 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: Reference Fields et al. (6,581,109) is made of record as teaching the art of calibration of displays. However, none of the prior art teaches or suggests that when it is determined that the client computer image display characteristics are unavailable to an image server, then "a set of default image display characteristics to adjust the requested image in accordance with the set of default characteristics for display on the client computer" are utilized. Furthermore, the default settings of the current application are an average or a generalization, whereas in prior arts, the default settings relate to the default settings of a particularly monitor, i.e., not a generalization for all brands of monitors.
